

Newsletter Rage

Version 1.0

January 2012

Welcome to Newsletter Rage. Newsletter Rage is a mailing list manager written in PHP. It was designed to be easy to use, but powerful at the same time. Newsletter Rage is a free application created by newsletterrage.com in conjunction with linaccess.com and is provided as-is with no warranty.

FEATURES:

- ❖ Clean, clear tabbed interface
- ❖ Easy subscribe/unsubscribe integration with any web page.
- ❖ Password controlled administration area
- ❖ E-mail confirmations to the subscriber upon subscribe / unsubscribe.
- ❖ E-mail updates to the list owner upon subscribe / unsubscribe including member count
- ❖ The ability to send messages as plain text or HTML (with a MIME compliant plain text version automatically created).
- ❖ SMTP support
- ❖ Mail Preview
- ❖ Bulk cleanup of unconfirmed members
- ❖ Bulk import and export of e-mail addresses
- ❖ Blacklisting
- ❖ Near live update of member count
- ❖ Templates
- ❖ Drafts

REQUIREMENTS:

- ❖ PHP 5.0 or later.
- ❖ MySQL 3.2 or later.

INSTALLATION:

- ❖ Unzip the archive.
- ❖ Upload the files to your web server
- ❖ Edit the configuration file
- ❖ Access the website, an install script will now take over the process
